Degree

Bossier Parish Community College
2015 – 2017
AS Engineering Degree

Bossier Parish Community College
2022 – 2023
AAS Software Development (in progress)

Work History

Nanny
October 2019-Present
Currently, I work as a nanny and caretaker of my nephew and niece. Before the pandemic, my family took a significant hit to our income and childcare became an issue, so I took time to look after the children. When the pandemic began this became vital as virtual schooling was required and childcare was non-existent. I am also using this time to work odd jobs and to further my education and get a degree in Software Development.

Shreveport Aquarium
February 2018-April 2019
I worked as an Education Host at the Shreveport Aquarium. My duties included protecting animals, educating guests, performing tours for schools and groups, and to further my knowledge on displayed species. Education Hosts prioritize interpersonal skills, diligence, and the pursuit of further knowledge and skills.

GameStop
February 2017 – November 2017
At GameStop, I was a Senior Guest Advisor. I had to make sure to actively engage with guests and see to their needs, as well as manage things within the store and direct workers under me. I greeted guests and engaged with them throughout their visit. I processed incoming and outgoing shipments, updated the store's marketing, and worked closely with Guest Advisors under me to guide them.

Bricks 4 Kidz
May 2015 – February 2017
At Bricks 4 Kidz (Shreveport/Bossier), I worked with children and young teens in an environment that encouraged both fun and learning. I worked as both an assistant and a fully fledged teacher in working with the children in lessons that encouraged them to follow directions, work together, learn, and express their creativity.
